WILBER
UNITE, 2023

TELL ME ABOUT YOUR AEOP EXPERIENCE...

My time in UNITE was truly remarkable. I had the opportunity to share my knowledge and experiences, and hone my skills alongside other students. Through various activities, I observed their unique talents and aspirations, which played a significant role in their journey of self-discovery and helped guide them towards their future careers.

IF YOU COULD HAVE A CONVERSATION WITH A FAMOUS SCIENTIST FROM HISTORY, LIKE ALBERT EINSTEIN OR MARIE CURIE, AND BRING THEM UP TO SPEED ON MODERN ADVANCEMENTS, WHAT TOPICS WOULD YOU DISCUSS?

I would discuss topics such as quantum mechanics, artificial intelligence, space exploration, and nanotechnology.

WHAT IS SOMETHING YOU ARE PASSIONATE ABOUT AND WHY?

I would like to program robots and incorporate artificial intelligence (AI) because it could lead to incredible innovations and solutions.

WHAT IS THE CRAZIEST THING YOU WOULD LIKE TO PURSUE IN STEM?

One of the craziest things I'd love to pursue in STEM is the creation of autonomous underwater drones capable of exploring the depths of the ocean and mapping its uncharted territories.

WHAT ARE YOUR FUTURE HOPES AND DREAMS?

I want to create new projects with artificial intelligence and work hard to achieve my goals, which highlights my determination and aspirations.
